Siesta Awning

Do you want

- Modern style?
- Simple reliable operation?
- Low maintenance?
- Optional Internal control?
- Optional electric motor control?

Then the **Siesta** is the awning you need.

An upmarket, modern awning with spring loaded arms to apply tension to the fabric.

The Front Rail, Arms and Cassette are of aluminium extrusion, clear anodized for long life.

The **Siesta** will cover the entire window and so is suitable for a window which faces any direction.

Operation is simple – tape or electric motor.

With the addition of an internal operation kit the **Siesta** can be operated from inside the room where there is no access to the outside e.g. upstairs.
